	Signal word	Warning							
	Hazard statement(s) H312 + H332 H315	Harmful in contact with Causes skin irritation.		lled					
	H319 H335	Causes serious eye irrit May cause respiratory i						. '	
	Precautionary statement								
	P261 P264 P271 P280	Avoid breathing dust/ fu Wash skin thoroughly a Use only outdoors or in Wear eye protection/ fa	fter handling. a well-ventila ce protection	ited area		<b>.</b> '			*
	P280	Wear protective gloves	protective cl	otning.					
	and the second	in the second						Page 1	of 8

P302 + P352	IF ON SKIN: Wash with plenty of soap and water.	
P302 + P352 + P312	IF ON SKIN: Wash with plenty of soap and water. Call a POISON	
	CENTER or doctor/ physician if you feel unwell.	
P304 + P340 + P312	IF INHALED: Remove victim to fresh air and keep at rest in a position	
	comfortable for breathing. Call a POISON CENTER or doctor/ physician if you feel unwell.	
D205 + D251 + D220	5	
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove	
	contact lenses, if present and easy to do. Continue rinsing.	
P332 + P313	If skin irritation occurs: Get medical advice/ attention.	
P337 + P313	If eye irritation persists: Get medical advice/ attention.	
P362	Take off contaminated clothing and wash before reuse.	
P403 + P233	Store in a well-ventilated place. Keep container tightly closed.	
P405	Store locked up.	
P501	Dispose of contents/ container to an approved waste disposal plant.	

2.3Hazards not otherwise classified (HNOC) or not covered by GHS Weak hydrogen fluoride-releaser

**3. COMPOSITION/INFORMATION ON INGREDIENTS** 

### 3.1Substances

Synonyms		: Cerous fluoride				
Formula	:	· CeF3			 	
Molecular weight CAS-No. EC-No.		: 197.11 g/mol : 7758-88-5 : 231-841-3	 	 	 1 - 1 1	

# Hazardous components

Component				Classification	Concentration
Cerium(III) fluorid	е				
				Acute Tox. 4; Skin Irrit. 2; Eye	90 - 100 %
				Irrit. 2A; STOT SE 3; H312 +	
1. A.	. 1	 	. 1	H332, H315, H319, H335	

For the full text of the H-Statements mentioned in this Section, see Section 16.

## **4. FIRST AID MEASURES**

## 4.1 Description of first aid measures

## General advice

Consult a physician. Show this safety data sheet to the doctor in attendance. Move out of dangerous area. Hydrofluoric (HF) acid burns require immediate and specialized first aid and medical treatment. Symptoms may be delayed up to 24 hours depending on the concentration of HF. After decontamination with water, further damage can occur due to penetration/absorption of the fluoride ion. Treatment should be directed toward binding the fluoride ion as well as the effects of exposure. Skin exposures can be treated with a 2.5% calcium gluconate gel repeated until burning ceases. More serious skin exposures may require subcutaneous calcium gluconate except for digital areas unless the physician is experienced in this technique, due to the potential for tissue injury from increased pressure. Absorption can readily occur through the subungual areas and should be considered when undergoing decontamination. Prevention of absorption of the fluoride ion in cases of ingestion can be obtained by giving milk, chewable calcium carbonate tablets or Milk of Magnesia to conscious victims. Conditions such as hypocalcemia, hypomagnesemia and cardiac arrhythmias should be monitored for, since they can occur after exposure.

#### If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

### In case of skin contact

Wash off with soap and plenty of water. Consult a physician.First treatment with calcium gluconate paste.

## In case of eye contact

Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

# If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

**4.2** Most important symptoms and effects, both acute and delayed The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

# 8.2 Exposure controls

# Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

# Personal protective equipment

### Eye/face protection

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

# Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

### **Body Protection**

Complete suit protecting against chemicals, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

### Respiratory protection

For nuisance exposures use type P95 (US) or type P1 (EU EN 143) particle respirator. For higher level protection use type OV/AG/P99 (US) or type ABEK-P2 (EU EN 143) respirator cartridges. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

# **Control of environmental exposure**

Do not let product enter drains.
